

The Fang lab in the Department of Medicine, Division of Cardiovascular Medicine at the University of California, San Diego, invites applications for a postdoctoral position.

The lab focuses on studies understanding the molecular mechanisms underlying cardiac development and disease. Utilizes a multi-disciplinary approach, combining molecular, cellular, developmental, and physiological techniques to uncover novel therapeutic targets and approaches for the prevention and treatment of cardiac diseases.

The UC San Diego Cardiovascular Medicine Division is renowned for the success in training young investigators, as exemplified by the excellent training records of the faculty members. UC San Diego is a world-class research university. UC San Diego Health Sciences is a multi-billion dollar organization encompassing 18 academic departments, 3 professional schools (School of Medicine, Skaggs School of Pharmacy and Pharmaceutical Sciences, Wertheim School of Public Health) 2 hospital, and numerous programs dedicated toward fulfilling the Health Sciences education, research, and clinical missions.

Applicants must have a Ph.D. and a strong background in molecular biology, biochemistry, genetics and/or cardiovascular biology. Please submit your CV along with three references to [xifang@ucsd.edu](mailto:xifang@ucsd.edu).

The University of California is an Equal Opportunity/Affirmative Action Employer with a strong institutional commitment to the achievement of excellence and diversity among its faculty and staff. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, age, disability, protected veteran status, or any other characteristic protected by law.
